

Jungle Music Website: Initial Zoom Meeting Notes

- Creative Director: Fiona Lyons-Carlson
- Developer/Designer: Aiden Cole
- Visual Components
 - Plain background with high contrast text
 - Sans serif text to emulate the contemporary time period of the music genre
 - Reminiscent of early Internet aesthetics—simple and clean
 - Dark colors with neon motifs
 - Cool button idea: Vinyl record button that spins!!
 - Would like to include rave flyers and record designs from jungle music's emergent period.
- Conceptual
 - Informational, educational
 - Would like to bring appropriate attention to the UK black youth origins of the musical genre
- Structure
 - Home page may be more image-based. Can click links to access subpages
 - Home page could have layout like the Type II posters: Scattered images throughout with drop-down feature to access more content
 - Subpages are open to discussion, there is not a set vision for them quite yet.
 - Top navigation bar that reads left to right (Home Page → References)
 - Unsure if References need their own page.
- Feedback from Developer
 - Inspiration
 - <https://virgilabloh.com/free-game/>
 - <https://canary---yellow.com/>
 - This is Aiden's first coding class. He feels capable of fulfilling requests regarding the website, but anticipates encountering roadblocks considering his past experience in this class. We came to the consensus that that is expected & okay, and will accommodate to one another's abilities and tastes.
